• Description:

The TD-W8950ND Wireless N ADSL2+ Modem Router is an All-in-One device that combines the functions of a high speed DSL modem, a 4-Port 10/100Mbps NAT router and a wireless access point. It is designed to give you a one-stop solution to acquire and share high speed Internet access over a wired/wireless network. Supporting the latest ADSL standards, the TD-W8950ND brings with it much higher speed than a dial-up connection without tying up the phone line. Compiling with the IEEE 802.11n, users will get up to 15X the speed and 5X the range of conventional 11g products. Now you can enjoy more kinds of bandwidth consuming applications like HD video streaming wirelessly, from anywhere in your entire home or even the yard. In addition, with the function of IPSec VPN (site-to-site), TD-W8950ND can guarantee the security of the data transmiting from home to corporate network or between remote branch offices.

¹The Easy Setup Assistant utility supports Windows 8/7/Vista operating system at present.
